Target Position: Senior System Administrator

Summary: Experienced System Administrator and Infrastructure Engineer with 12+ years of hands-on experience designing, implementing, and supporting enterprise IT environments. Proven background in Windows and Linux administration, virtualization, networking, high-availability infrastructure, and complex system integration. Strong troubleshooting, documentation, and automation skills, with experience supporting mission-critical production and testing environments.

Technical Skills:

- ***Linux & Windows Infrastructure:*** Linux Server (RHEL, Ubuntu, Debian); Windows Server (AD, GPO, DNS, DHCP, WSUS, RDS, Exchange, SCCM)
- ***Virtualization:*** VMware vSphere, ESXi, vCenter, HA, vMotion; Microsoft Hyper-V
- ***Networking & Security:*** Cisco L2/L3, WLC, Fortinet, VLAN, LACP, VRF, OSPF, RADIUS, VPN, NAT
- ***Automation & Scripting:*** PowerShell, Python, Bash, C#, SQL
- ***Platforms & Tools:*** Ansible, Docker, WSL, Git, REST API
- ***Hardware & Remote Management:*** HP, Dell, IBM, Supermicro, RAID, PXE, IPMI, KVM, UPS
- ***Monitoring & Backup:*** Zabbix, Prometheus, Grafana, Veeam Backup

Languages: *English* – Upper Intermediate (B2) | *Hebrew* – Elementary(A2) | *Russian* – Native

Flextronics (electronics manufacturing), *North District, Israel*

Test Technician (Feb 2024 – present)

- Maintenance and troubleshooting functional test stations at Nvidia Switching Project (Mass Production Line) to prevent breakdowns and improve reliability.
- Installing and configuring Linux-based systems (PXE).
- Implementing scripts in Python and Bash for automation tasks reducing manual tasks by 30%.
- Troubleshooting and diagnosing technical issues, analyzing system logs and error messages.
- Perform V&V of test stations to ensure compliance with quality standards.

Tschudi Ship Management AS (offshore company), Pipe lay construction vessel, *Germany and Russia*

Senior IT Engineer (2020 – 2023)

- Led IT modernization on vessels for the «Nord Stream 2» project and future projects.
- Designed and maintained multi-site network and data center infrastructure based on Cisco core switches (VSS), ASA firewalls, and WLC controllers with VLAN segmentation, VRF isolation and OSPF routing.
- Deployed and maintained onboard data center racks with virtualized infrastructure (VMware ESXi)
- Managed networks, server virtualization infrastructure, and all IT vessel equipment.
- Improved cybersecurity by setting up firewall policy and strong malware protection.
- Increased reliability by automating backups with Veeam and implemented monitoring system Zabbix.
- Implemented and maintained: TM Master, SCADA-base systems, AVEVA Historian, VSAT, CCTV.

GS Nanotech (microelectronics manufacturing), *Kaliningrad, Russia*

Senior MES Engineer (*2016 – 2020)*

- Supported and maintained the MES system «*CM NAVIGO*» used in microelectronics manufacturing.
- Administered a high-availability Hyper-V cluster on IBM servers in on-premises data center.
- Monitored system performance and storage, performed routine maintenance and updates.
- Developed custom C# utilities and SQL procedures to improve data consistency and reporting
- Integrated production equipment and software systems to ensure continuous manufacturing operations.

MRTS (offshore construction company), *Arkhangelsk, Russia*

Lead IT communication officer (2014 – 2016)

- Supervised a team of 3 engineers: planned tasks, enforced SLAs, and coordinated system upgrades
- Achieved 99.9% uptime for critical services (mail, file sharing, VoIP).
- Designed and deployed data center infrastructure (3-blade ESXi cluster with shared storage) and cisco network topology (VLAN segmentation, trunking)
- Managed switch configuration, structured cabling, and high-availability services.

Northern Shipping Company, *Arkhangelsk, Russia*

System Administrator (2011 – 2014)

- Managed AD and GPO, maintained IT infrastructure, users support (350+ users).
- Ensured the uninterrupted operation of servers and configured server systems.

Education and Certification: Higher (Master of Science)

Northern (Arctic) Federal University, Institute of Information Technology**,**

Software Engineer (*2005 – 2011)*

Microsoft: **Querying Data with Transact-SQL (Exam 70-761),** 2019
Microsoft: **MTA Networking Fundamentals**, 2016
Microsoft: **MTA Windows Server Administration Fundamentals**, 2016
